SUBJECT OUTLINE:
Graphics is a course designed to provide the opportunity for students to plan procedures, solve complex problems, and make decisions. Graphics will provide learning experiences which promote the knowledge of graphical concepts, drafting skills and good work habits. Graphics will provide a solid foundation for architectural and engineering tertiary studies. At least 25% of the timetabled allocation will be used for CAD (Computer Aided Drafting), so a good knowledge of computer technology will aid students in the course.

CONTRIBUTES TO OP:
Yes

ASSESSMENT OUTLINE
A variety of assessment techniques including drawing portfolios, theory tests and open ended assignments.

CAREER PATHWAYS:
Draftsperson, Architect, Engineer, Designer
