HEAD OF DEPARTMENT:  Drew Dundas

SUBJECT OUTLINE:

Information Technology Systems (ITS) is a practical discipline which prepares students to respond to emerging technologies and information technology (IT) trends. Students develop the knowledge of, and skills in, the systems supporting IT. Systems range from those supporting the development of information, such as documents or websites, to those supporting technology, such as computers or networks.

CONTRIBUTES TO OP:
Yes

ASSESSMENT OUTLINE

Assessment techniques used may include written tasks involving short and extended written responses, oral presentations, practical exercises, and tests and examinations.

CAREER PATHWAYS:
IT support technician, Software engineer, IT administrator, Electronics engineering technician, Computer systems engineer.
